THURSDAY 9 SEPTEMBER – GLOBAL DAY

The 2030 Green Window

Time is ticking. While we gathered a cumulative USD 1 trillion of investments in green bonds by December 2020, we need the same amount every year for investments in climate change. Our Global Day focusses on international cooperation and the Green Window we need to step through to get the main blocs committed and acting. Expect panel discussions with representatives of the most relevant regulators, and how to move forward, highlighting the urgent acceleration we need on climate action.
